

HIPAA/HITRUST Program for Healthcare ISVs

By partnering with Project Hosts, Healthcare ISVs can deliver their Windows and Linux applications as a **HIPAA/HITRUST Compliant** service much faster, and more affordably than doing it on their own.

✓ **TURN KEY COMPLIANCE: AZURE SECURITY ENVELOPE**

By leveraging Project Hosts' HIPAA/HITRUST Azure Security Envelope, ISVs can allocate more resources to develop innovative software applications that improve the customer experience and maximize operational efficiencies. ISVs can rely on Project Hosts to gain HIPAA/HITRUST compliance for their application, while also gaining access to Azure experts who can architect, build, scale and provide advanced DRaaS, backup and archiving for their SaaS solutions.

✓ **WITH US: MUCH FASTER AND AFFORDABLE OPTION**

You can dramatically reduce the time and expense of delivering your application from a HIPAA/HITRUST cloud by working with Project Hosts.

- We'll perform all the steps necessary to ensure that you are approved within 6 weeks instead of 3 - 6 months.
- Whereas it might cost customers and ISVs between \$50k - \$150k to achieve compliance, through the HIPAA/HITRUST Azure Security Envelope, this can be achieved at a fraction of the cost.
- Pre-Migration Audit – We'll perform the necessary audit to highlight all the critical elements of your existing deployment including application, OS / DB platform, data/content, applications add-ons, configurations, security standards, reports, workflow and other critical aspects, saving you both time and money.
- Make The Move – We'll create a new Azure Cloud in either your subscription, or ours, with the most up-to-date databases and applications, and migrate your data/content and any configuration settings.

"Project Hosts provides Azure security envelopes that, together with supporting policies and procedures, implement controls related to access, authentication, encryption, auditing, business continuity, change management, incident response, privacy, annual assessment and other areas required for compliance with leading standards, including HIPAA, HITRUST, ISO 27001, and FedRAMP."

Scott Chapman, CEO

BENEFITS OF THE HIPAA/HITRUST ISV PROGRAM FROM PROJECT HOSTS

- **Hosted in Microsoft Azure**
Your application will be hosted and managed in Microsoft Azure an advanced, reliable, available, scalable and secure cloud platform.
- **Team of experienced Professionals**
We perform the necessary tests and create the documentation necessary to ensure that your application runs well in our Azure Cloud.
- **Complete Migration Plan (CMP)**
Project Hosts is a Microsoft CSP (Cloud Service Provider) with more than 13 years of Managed Hosting and Cloud Security Services. We'll develop a Custom Migration Plan for you that includes all aspects of the considerations, security aspects and pricing.
- **A Microsoft Sponsored ISV Program**
This program utilizes Project Hosts' HIPAA/HITRUST SaaS-compliant status and expertise in Azure and can significantly reduce the expense it would take ISVs to secure HIPAA/HITRUST SaaS compliance on their own.
