& Compliance

Start With Confidence, Not Complexity

Many organizations hesitate to begin compliance initiatives due to uncertainty around cost, timelines, and business justification. EarlyStart™ removes those barriers by providing a flexible, phased path forward - allowing organizations to build momentum, demonstrate demand, and invest at a pace aligned with business objectives.

- ✓ Begin your compliance journey while you solidify your a business case.
- ✓ Position yourself to respond to RFIs and RFPs to build momentum while evaluating market opportunities.
- ✓ Work at the pace of your initiative.
- ✓ Control costs with just-in-time pricing and invoicing.
- ✓ Establish your business justification before committing to full FedRAMP Certification.

Build Your Foundation for FedRAMP Certification

EarlyStart™ enables organizations to begin implementing the technical, operational, and compliance components required for certification — without waiting to commit to a full certification effort.

Our proven compliant infrastructure and framework establishes your environment, inherits controls, develops required documentation, and generates audit evidence while your business case continues to mature.

This approach allows teams to demonstrate measurable progress, respond effectively to RFIs and RFPs, and show stakeholders tangible commitment to compliance initiatives.

Don't delay action until every business decision is finalized. Start building the foundation required for certification while controlling costs through a phased investment model.

As demand, funding, and market opportunities become clearer, you will be positioned to transition with compliant architecture and documented processes, to full certification quickly.

A Structured Path Forward

EarlyStart™ provides a phased approach that helps you make measurable progress while Project Hosts handles the complexity behind the scenes.

Phase 1: **Build Your Foundation**

Project Hosts designs and deploys a secure, compliance-ready environment tailored to your application. We establish the technical baseline, implement core controls, and position your solution for early marketplace visibility — all within a matter of weeks.

Phase 2: **Develop Your Compliance Package**

As your business case takes shape, we take the lead on authoring your System Security Plan (SSP) and compiling the required evidence, documentation, and architecture diagrams. Our team ensures everything is audit-ready while minimizing the lift on your internal resources.

Phase 3: **Prepare for Audit and Certification**

Project Hosts acts as an extension of your team, taking ownership of audit preparation and certification execution. We validate requirements, drive audit readiness activities, manage communications, and lead assessor engagement throughout the audit process - bringing the expertise and proven methodology needed to achieve a successful assessment and accelerate your path to certification.

Support Beyond the Starting Line

Project Hosts doesn't just help you get started, we remain engaged throughout the lifecycle of your compliance program, providing expertise, operational support, and ongoing services required to maintain compliance and drive long-term success.

- ✓ Continuous monitoring, maintenance, and compliance operations.
- ✓ Expert guidance across technical, security, and audit requirements.
- ✓ Reduced operational burden through fully managed services.
- ✓ A clear, scalable path from readiness and certification to ongoing continuous monitoring and sustainment.

Contact Project Hosts today to learn how EarlyStart™ helps you build momentum toward FedRAMP Certification while validating your business case.
